

Prepared By Joint Task Force:
Canadian Construction Association and
Association of Consulting Engineers of Canada

August 1993

*Recommended Guidelines
for Provision of
Geotechnical Information in
Construction Contracts*

Table of Contents

	PAGE
Acknowledgement/Note	
1.0 Introduction	1
2.0 Objectives of the Guidelines	2
3.0 Risk Allocation	3
4.0 Risk Minimization	5
4.1 Preliminary Works as a Separate Part of the Construction Program	5
4.2 Pre-stated Rates and Prices	5
4.2.1 Use of Schedule of Rates and Contingent Items	5
4.2.2 Definition of Materials for Excavation	6
4.3 Prequalification of Contractors	6
5.0 Geotechnical Information	8
5.1 Present Practice	8
5.2 Problem with Present Practice	9
5.3 Recommended Practice for Commissioning Geotechnical Investigations	10
5.4 Recommended Practice for Conducting Geotechnical Investigations	11
5.5 Recommended Practice for Reporting Geotechnical Investigations	11
6.0 Treatment of Geotechnical Reports in Tender Document	15
6.1 Full Disclosure	15
6.2 Recommended Presentation	16
6.2.1 Re-appraisal of Reports	16
6.2.2 Qualifications	16
6.2.3 Uncertainty	17
6.2.4 Tender Drawings	17
6.3 Site Meeting	17
6.4 Disclaimers, Exclusions and Limitations of Liability	17
7.0 Recommended Contract Provisions for Geotechnical Information in Construction Contracts	19
7.1 Unexpected Conditions	19
7.2 Toxic and Hazardous Substances	19
8.0 Conclusions	20
